

AP25 ACCESS DENIAL SYSTEM

Retrofit Glass Protection

PATENT # US 10,450,793 B2

An otherwise peaceful downtown street can erupt into total mayhem during civil unrest or an organized attack on a targeted property. ArmorPlast® Access Denial System from Riot Glass, Inc. provides unmatched protection, even under assault from multiple attackers with heavy tools or firearms. Riot Glass® polycarbonate panels block an armed assailant's preferred path of entry, through vulnerable windows and glass doors.

Additionally, while the AP25 and AP375 panels allow bullets to pass through, they stop the bad guys, and their guns, from getting inside. Even after being riddled with bullets, the AP systems hold strong and do not allow entry. Suited for either new construction projects or retrofits, ArmorPlast® can be installed inside (back glazing) or outside (over glazing) your existing glass.

ArmorPlast® panels are part of a package that also includes a patented framing system engineered to withstand a prolonged violent intrusion attempt. Narrower profile frames from imitators can fail under sustained loads. Under attack the framing becomes the weak link, displacing the security panel and allowing entry. Not so with ArmorPlast®. Together, the framing and military-grade Riot Glass® polycarbonate create a formidable barrier to entry with superior appearance and durability. Available in clear or bronze anodize as well as mill finish for custom coating, the ArmorPlast® system has the fit and finish to blend in seamlessly with the world's finest storefront and curtainwall glazing.

The ultimate smash and grab defense

ARMORPLAST® AP25-ACCESS DENIAL SYSTEM

PERFECT FOR INSTALLATION AT:

HIGH-END RETAIL STORES	GOVERNMENT FACILITIES	WAREHOUSES	CASINOS
GAS STATIONS	BANKS	DISPENSARIES	SECURITY FIRMS
SCHOOLS	HIGH THREAT PROPERTIES	HOSPITALS	PAWN SHOPS

Attackers and thieves can't steal or plunder, if they can't get into the property!

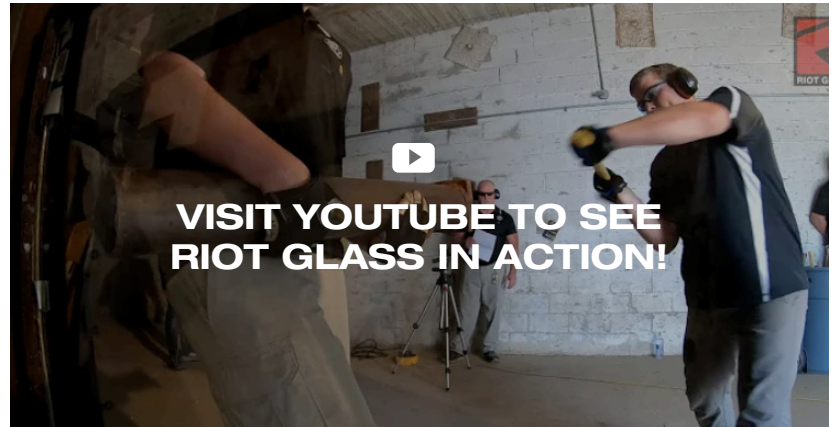

AP25 ACCESS DENIAL SYSTEM

Features and details of ArmorPlast® AP25 Access Denial System:

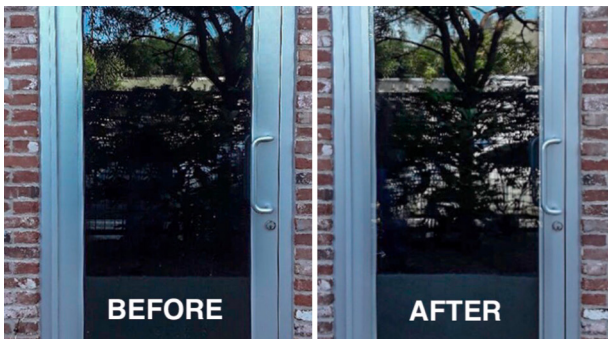

- Retrofit panel system that installs on top of new or existing storefront installations.
- Standard dark bronze and clear anodize finishes to match storefronts of all types.
- Reinforced, patented framing supports ArmorPlast® containment grade polycarbonate panels.
- UV resistant, ArmorPlast® panels offer enhanced resistance against yellowing and hazing.
- Nonballistic glazing shield allows bullet penetration, but maintains strength after.
- Custom painted color options and mill finish to match existing storefronts available on larger projects.
- Subjected to rigorous testing by H.P. White using 12 lb sledge hammers, fire extinguishers, pipes, baseball bats, propane torches, angle iron, hammers, bricks, and even a 120 lb ram—NO ENTRY.
- Max Single Panel Size: 72" x 120"—additional mullions available for larger installations.

Bronze ArmorPlast® system with full frame on the windows and surface mount on the doors.
